

HINGED FLIP LID INSTRUMENT CASE WITH ALUMINIUM FRONT PANEL

A relatively low cost high quality case moulded in black polypropylene with an overall textured finish and supplied with an anodised aluminium front panel and fixing screws. A rectangular flat area is provided on the base on the hinged end of the box which can be used for test leads, connectors, output sockets etc. The lid when closed is held on to the box with an integral catch arrangement and has a label attachment area on the outside.
